

REMARKS

Claim Objections

Within the Office Action, the Examiner objects to claims 6, 21, 23 and 24 because the Examiner alleges that claim 6 "does not convey a clear and complete thought". The Applicant is currently amending claims 6, 21, 23 and 24 to clearly claim the Applicant's present invention.

Allowable Subject Matter and Claims Rejections

Applicant respectfully disagrees with the Examiner's conclusion that the prior art on reference either anticipate Applicant's claimed invention or render the claimed invention obvious. However, to further prosecution the Applicant is currently amending the claims such that the allowable subject matter identified by the Examiner is now incorporated into the independent claims. Specifically, claims 1 and 10 are currently amended to include limitations from claims 2 and 11. The Examiner has identified these limitations as allowable and indicated that they are not taught in the prior art. Therefore, claims 1, 3-10 and 12-42 are allowable and a prompt issuance of a Notice of Allowance would be greatly appreciated.

Conclusion

As set forth above, all of the objections and rejections as been overcome. Therefore claims 1, 3-10 and 12-42 are in condition for allowance and an early issuance of a Notice of Allowance would be appreciated.

Should the Examiner have any questions regarding the application, he is respectfully urged to contact Applicant's attorney at (650) 474-8400.

Respectfully submitted,

Michael A. Glenn
